**Volume 38, 2003**

# List of Contents

## NUMBER 1/2

<b>D. Greenspan</b>	1 Discrete Physics with Conservation and Galilean Invariance
<b>A. Noore</b>	13 Real Time Fault Tolerant Control of Robot Manipulators
<b>P. Zhang and X. Li</b>	23 An Infeasible-Start Path-Following Method for Monotone LCPs
<b>A. Leontitsis</b>	33 A Note on Shuffled Financial Surrogates
<b>J. S. R. Anttonen, P. I. King and P. S. Beran</b>	41 POD-Based Reduced-Order Models with Deforming Grids
<b>D. K. Satpathi, B. V. Rathish Kumar and P. Chandra</b>	63 Unsteady-State Laminar Flow of Viscoelastic Gel and Air in a Channel: Application to Mucus Transport in a Cough Machine Simulating Trachea ,
<b>M. Delgado Pineda and E. A. Galperin</b>	77 Global Optimization in $R^n$ with Box Constraints and Applications: A MAPLE Code
<b>E. Ponsoda, J. V. Romero, J. R. Serrano and J. M. Arnau</b>	99 A New Iterative Method for Flow Calculation in Intake and Exhaust Systems of Internal Combustion Engines
<b>T. Yoshikawa and A. M. Balk</b>	113 A Conformal-Mapping Model for Bubbles and Fingers of the Rayleigh-Taylor Instability
<b>H. Rasmussen, G. C. Wake and J. Donaldson</b>	123 Analysis of a Class of Distributed Delay Logistic Differential Equations
<b>H. P. Urbach</b>	133 Generalised Sampling Theorem for Band-Limited Functions
<b>A. Abouhamza and R. Pierre</b>	141 A Neutral Stability Curve for Incompressible Flows in a Rectangular Driven Cavity
<b>R. A. Adomaitis</b>	159 A Reduced-Basis Discretization Method for Chemical Vapor Deposition Reactor Simulation
<b>P. K. Palamides</b>	177 Generalized Painlevé Equation and Superconductivity. Asymptotic Behavior of Unbounded Solutions
<b>S. Dontha and Z. Drici</b>	191 Variational Lyapunov Method for Discrete Hybrid Systems
<b>S. Asghar, M. R. Mohyuddin and T. Hayat</b>	201 Unsteady Flow of a Third-Grade Fluid in the Case of Suction
<b>C. Gout and A. Guessab</b>	209 Extended Lagrange Interpolation and Nonclassical Gauss Quadrature Formulae

## NUMBER 3/4

- |   |     |   |
|---|-----|---|
| <b>D. Greenspan</b>   | 229 | A New Theory of the Molecular Bond  |
| <b>T. L. Saaty and<br/>M. S. Ozdemir</b>  | 233 | Why the Magic Number Seven Plus or Minus Two  |
| <b>J. Banaś and<br/>K. Sadarangani</b>  | 245 | Solutions of Some Functional-Integral Equations in Banach Algebra   |
| <b>H. M. Yang,<br/>M. Della Negra,<br/>Y. C. Liang, W. Queiroz<br/>and L. K. Hotta</b>          | 251 | The Seroreversion and the Survival Related to HIV Infection Among Children: Statistical Modeling Applied to Retrospective Data Collection |
| <b>S. Karaa, J. Zhang<br/>and C. C. Douglas</b>   | 269 | Preconditioned Multigrid Simulation of an Axisymmetric Laminar Diffusion Flame  |
| <b>S. R.-J. Jang<br/>and J. Baglama</b>   | 281 | Persistence in Variable-Yield Nutrient-Plankton Models  |
| <b>Y. Zhou and H. Liu</b>   | 299 | Stability of Periodic Solutions for an SIS Model with Pulse Vaccination   |
| <b>L. Zietsman,<br/>A. J. van der Merwe,<br/>J. J. Geldenhuys and<br/>N. F. J. van Rensburg</b> | 309 | Application of the Finite-Element Method to the Vibration of a Rectangular Plate with Elastic Support at the Boundary                     |
| <b>L. Egghe, L. Liang<br/>and R. Rousseau</b>   | 323 | The Byline: Thoughts on the Distribution of Author Ranks in Multiauthored Papers  |
| <b>B. G. Zhang, Y. Zhou and Y.<br/>Q. Huang</b>   | 331 | Existence of Positive Solutions for Certain Nonlinear Partial Difference Equations  |
| <b>R. Tsaih</b>   | 339 | The Evolution of Internal Representation  |
| <b>J. P. Kenne, E. K. Boukas<br/>and A. Gharbi</b>  | 351 | Control of Production and Corrective Maintenance Rates in a Multiple-Machine, Multiple-Product Manufacturing System                       |
| <b>M. L. Bertotti<br/>and N. Bellomo</b>  | 367 | Boundary Value Steady Solutions of a Class of Hydrodynamic Models for Vehicular Traffic Flow  |
| <b>C.-B. Cheng</b>  | 385 | A Fuzzy Inference System for Similarity Assessment in Case-Based Reasoning Systems: An Application to Product Design                      |
| <b>Q. He, Z.-Z. Shi,<br/>L.-A. Ren and E. S. Lee</b>  | 395 | A Novel Classification Method Based on Hypersurface   |
| <b>M. S. Mongiogi and<br/>R. A. Peruzza</b>   | 409 | Fast Relaxation Phenomena and Slow Mode in Extended Thermodynamics of Superfluids   |
| <b>B. Carbonaro</b>   | 423 | The "Raven Paradox" in the Light of Probability Theory  |

**T. K. Kar**

- 449 Selective Harvesting in a Prey-Predator Fishery with Time Delay

### NUMBER 5/6

**J. P. Arenas  
and V. Poblete**

- 459 Asymptotic Approximation for Sound Propagation in Ducts Carrying Low Subsonic Mean Flow

**J. M. Montagna and  
A. R. Vecchietti**

- 465 Retrofit of Multiproduct Batch Plants Through Generalized Disjunctive Programming

**D. R. Anderson  
and J. Hoffacker**

- 481 A Stacked Delta-Nabla Self-Adjoint Problem of Even Order

**P. S. Crooke, S. Hota,  
J. J. Marini and  
J. R. Hotchkiss**

- 495 Mathematical Models of Passive, Pressure-Controlled Ventilation with Different Resistance Assumptions

**M.-H. Zhang  
and Q.-S. Cheng**

- 503 Gaussian Mixture Modelling to Detect Random Walks in Capital Markets

**Y. Wang and Y. Meng**

- 509 Asymptotic Behavior of a Competition-Diffusion System with Time Delays

**S. Fackrell,  
M. Mastroianni  
and G. W. Rankin**

- 519 Model of the Filling of an Automotive Fuel Tank

**J.-B. Sheu, Y.-H. Chou  
and M.-C. Weng**

- 533 Stochastic System Modeling and Optimal Control of Incident-Induced Traffic Congestion

**R. Pavani, F. Calio'  
and E. Garavaglia**

- 551 Numerical Modelling in Building Reliability Using Both a Probabilistic Approach and a Delay Differential Model

**L.-H. Chen  
and M.-C. Weng**

- 559 A Fuzzy Model for Exploiting Quality Function Deployment

**P. S. Williams  
and T. E. Simos**

- 571 A New Family of Exponentially Fitted Methods

**J. Golec and  
S. Sathananthan**

- 585 Stability Analysis of a Stochastic Logistic Model

**J. Wang**

- 595 A Weight-Balanced Branching Rule for SAT

**Y. Yavin**

- 611 Modelling and Control of the Motion of a Trolley Moving on a Plane with a Time-Dependent Inclination

**L. R. Foulds and  
K. Neumann**

- 623 A Network Flow Model of Group Technology

**N. Bellomo, E. Mamontov  
and M. Willander**

- 637 The Generalized Kinetic Modelling of a Multicomponent "Real-Life" Fluid by Means of a Single Distribution Function.

**P.-F. Pai**

- 661 Capacitated Lot Size Problems with Fuzzy Capacity

**T. Dumrongpokaphan,  
Y. Lenbury  
and P. S. Crooke**

- 671 The Analysis of Higher-Order Cascade Systems with Separation Conditions Pivoting on the Slow Components: Application to a Model of Migration for Survival of the Species

## NUMBER 7-9

### HUNGARIAN APPLIED MATHEMATICS AND COMPUTER APPLICATIONS

**A. Benczúr**

Xiii, Preface

**A. Benczúr**

- 691 The Evolution of Human Communication and the Information Revolution—A Mathematical Perspective

**M. Arató**

- 709 A Famous Nonlinear Stochastic Equation (Lotka-Volterra Model with Diffusion)

**V. Bentkus, G. Pap  
and M. van Zuijlen**

- 727 Confidence Bounds for a Parameter

**F. Bodon and L. Rónyai**

- 739 Trie: An Alternative Data Structure for Data Mining Algorithms

**S. Csörgö**

- 753 Weighted Correlation Tests for Location-Scale Families

**J. Demetrovics,  
Gy. O. H. Katon and D. Miklós**

- 763 Recent Combinatorial Results in the Theory of Relational Databases

**J. Demetrovics, L. Rónyai  
and S. Hua Nam**

- 773 Dependencies and Generalized Relations

**G. Farkas**

- 783 Periodic Elements and Number Systems in  $\mathbb{Q}(\sqrt{2})$

**G. Fazekas**

- 789 An Extremum Problem for Polynomials and Bounds for Codes with Given Distance and Diameter

**G. Fazekas and R. Jónás**

- 797 A Scaling and Rotating Invariant Object Matching Algorithm

**S. Fegyverneki**

- 803 Robust Estimators and Probability Integral Transformations

**Á. Fóthi, J. Nyéky-Gaizler  
and Z. Porkoláb**

- 815 The Structured Complexity of Object-Oriented Programs

**J. Gáll**

- 829 Some Possible Stock Price Distributions under Incompleteness of the Market

**T. Gyires**

- 839 Software Agents Architecture for Controlling Long-Range Dependent Network Traffic

**M. Hoffmann and E. Kovács**

- 849 Developable Surface Modelling by Neural Network

**Cs. Holló**

- 855 A Partial Enumeration Algorithm for Solving PNS Problems

<b>Z. Horváth, V. Zsók, P. Serrarens and R. Plasmeijer</b>	865	Parallel Elementwise Processable Functions in Concurrent Clean
<b>I. Juhász and Zs. Bancsik</b>	877	Increasing the Degree of Closed B-Spline Curves
<b>I. Kátai</b>	883	Generalized Number Systems in Euclidean Spaces
<b>L. Kollár</b>	893	GUIML, Creating Dynamic GUI Objects Using XML
<b>J. Kormos and K. Veréb</b>	903	Recognition of Chain-Coded Patches with Statistical Methods
<b>A. Kovács</b>	909	Number Expansions in Lattices
<b>M. Lénárd</b>	917	Birkhoff Quadrature Formulae Based on the Zeros of Jacobi Polynomials
<b>E. Molnár, I. Prok and J. Szirmai</b>	929	D-V Cells and Fundamental Domains for Crystallographic Groups, Algorithms, and Graphic Realizations
<b>M. Szilvási-Nagy and Gy. Mátyasi</b>	945	Analysis of STL Files
<b>J. Sztrik and C. S. Kim</b>	961	Markov-Modulated Finite-Source Queueing Models in Evaluation of Computer and Communication Systems
<b>K. Veréb</b>	969	Generalization of the Binary Pattern Matching in Image Processing

## NUMBER 10

<b>R. Bru, R. Cantó and B. Ricarte</b>	975	Modelling Nitrogen Dynamics in Citrus Trees
<b>B. P. Allahverdiev</b>	989	Dilation and Functional Model of Dissipative Operator Generated by an Infinite Jacobi Matrix
<b>D. Hömberg and S. Volkwein</b>	1003	Control of Laser Surface Hardening by a Reduced-Order Approach using Proper Orthogonal Decomposition
<b>Y. Yavin</b>	1029	Modelling the Motion of a Car with Four Steerable Wheels
<b>G. S. Ladde, N. G. Medhin and M. Sambandham</b>	1037	Error Estimates for Random Boundary Value Problems with Applications to a Hanging Cable Problem
<b>F. Wang, Z. Ma and Y. Shao</b>	1051	A Competition Model of HIV with Recombination Effect
<b>L. Graziano and R. Lancellotta</b>	1067	A Constitutive Equation for the Porosity Field
<b>B. B. King and D. A. Krueger</b>	1075	Burgers' Equation: Galerkin Least-Squares Approximations and Feedback Control
<b>I.-S. Kim</b>	1087	Positive Eigenvalues of Countably Contractive Maps

**P. Degond, C. Parzani  
and M.-H. Vignal**

1093 A One-Dimensional Model of Plasma Expansion

**J. Clarke and C. Lowe**

1101 A Class of Analytical Solutions to the Euler Equations  
with Source Terms: Part II

## NUMBER 11-13

### STOCHASTIC MODELS IN ENGINEERING, TECHNOLOGY, AND MANAGEMENT

**R. Wilson, M. Faddy  
and D.N. Pra Murthy**

xv Preface

**M. Abdel-Hameed**

1119 Optimal Control of Dams Using  $P_{\lambda, \tau}^M$  Policies and Penalty  
Cost

**K. Amasaka**

1125 Proposal and Implementation of the "Science SQC"  
Quality Control Principle

**M. Bebbington, C.-D. Lai  
and K. Govindaraju**

1137 Continuous Sampling Plans for Markov-Dependent  
Production Processes under Limited Inspection Capacity

**M. Bebbington, P. Pollett  
and I. Ziedins**

1147 Product Form Approximations for Highly Linear Loss  
Networks with Trunk Reservation

**R. E. Dickinson  
and C. E. M. Pearce**

1157 Rumours, Epidemics, and Processes of Mass Action:  
Synthesis and Analysis

**T. Dohi, A. Ashioka,  
N. Kaio and S. Osaki**

1169 The Optimal Repair-Time Limit Replacement Policy with  
Imperfect Repair: Lorenz Transform Approach

**T. Dohi, K. Yasui and S. Osaki**

1177 Software Reliability Assessment Models Based on  
Cumulative Bernoulli Trial Processes

**M. J. Faddy and G. J. Taylor**

1185 Stochastic Modelling of the Onset of *Bronchiolitis  
Obliterans Syndrome* Following Lung Transplantation:  
An Analysis of Risk Factors

**H. Hohjo and Y. Teraoka**

1191 A Competitive Inventory Model with Reallocation on a  
Plane Market

**E. Hunt**

1203 A Probabilistic Algorithm for Determining the  
Fundamental Matrix of a Block  $M/G/1$  Markov Chain

**A. Z. M. O. Hussain  
and D. N. P. Murthy**

1211 Warranty and Optimal Reliability Improvement through  
Product Development

**M. Imaizumi, K. Yasui  
and T. Nakagawa**

1219 Reliability of a Job Execution Process Using Signatures

**H. Inoue and H. Narihisa**

1225 Efficiency of Self-Generating Neural Networks Applied to  
Pattern Recognition

**B. P. Iskandar and  
D. N. P. Murthy**

1233 Repair-Replace Strategies for Two-Dimensional Warranty  
Policies

<b>K. Ito and T. Nakagawa</b>	1243	Optimal Self-Diagnosis Policy for FADEC of Gas Turbine Engines
<b>H.-D. J. Jeong, K. Pawlikowski and D. C. McNickle</b>	1249	Generation of Self-Similar Processes for Simulation Studies of Telecommunication Networks
<b>R. Jiang and D. N. P. Murthy</b>	1259	Study of $n$ -Fold Weibull Competing Risk Model
<b>K. Katayama, H. Hirabayashi and H. Narihisa</b>	1275	Analysis of Crossovers and Selections in a Coarse-Grained Parallel Genetic Algorithm
<b>T. Katayama and K. Kobayashi</b>	1283	Sojourn Time Analysis of a Two-Phase Queueing System with Exhaustive Batch-Service and Its Vacation Model
<b>M. Kimura and S. Yamada</b>	1293	A Hidden-Markov Estimation Method for Mean-Shift Detection of Fraction Defective in Production Process Control
<b>K. Kimura, K. Yasui, T. Nakagawa and N. Ishii</b>	1303	Optimal Checkpointing Interval of a Communication System with Rollback Recovery
<b>T. Kimura</b>	1313	A Consistent Diffusion Approximation for Finite-Capacity Multiserver Queues
<b>K. Kohmoto, K. Katayama and H. Narihisa</b>	1325	Performance of a Genetic Algorithm for the Graph Partitioning Problem
<b>J. Koyanagi and H. Kawai</b>	1333	An Optimal Age Maintenance for an $M/G/1$ Queueing System
<b>C. D. Lai and M. Xie</b>	1339	Relative Ageing for Two Parallel Systems and Related Problems
<b>K. Nakada and T. Yoneyama</b>	1347	A Stochastic Model to Evaluate Performance of Testing and Taping Processes on an LSI Production System
<b>S. Nakagawa, S. Fukumoto and N. Ishii</b>	1357	Optimal Checkpointing Intervals of Three Error Detection Schemes by a Double Modular Redundancy
<b>T. Nakagawa and K. Yasui</b>	1365	Note on Reliability of a System Complexity
<b>S. Nakamura, C. Qian, S. Fukumoto and T. Nakagawa</b>	1373	Optimal Backup Policy for a Database System with Incremental and Full Backups
<b>M. Ohnishi</b>	1381	An Optimal Stopping Problem for a Geometric Brownian Motion with Poissonian Jumps
<b>H. Okamura, T. Dohi and S. Osaki</b>	1391	Phase Type Approximation for Optimal Auto-Sleep Scheduling
<b>M. Otaka and T. Yoshida</b>	1399	Study on Option Pricing in an Incomplete Market with Stochastic Volatility Based on Risk Premium Analysis
<b>P. K. Pollett and M. R. Thompson</b>	1409	A New Method for Analysing the Equilibrium and Time-Dependent Behaviour of Markovian Models
<b>T. Satow and S. Osaki</b>	1419	Opportunity-Based Age Replacement with Different Intensity Rates

- |   |      |   |
|---|------|---|
| <b>A. Shan, R. N. Roth<br/>and R. J. Wilson</b>           | 1427 | Genetic Algorithms in Statistical Tolerancing   |
| <b>T. K. Soboleva and<br/>A. B. Pleasants</b>             | 1437 | Population Growth as a Nonlinear Stochastic Process   |
| <b>K. Tokuno and S. Yamada</b>                            | 1443 | Markovian Software Reliability Measurement with a Geometrically Decreasing Perfect Debugging Rate                   |
| <b>W. S. Verwoerd<br/>and D. Kulasiri</b>                 | 1453 | Theory of Diffusions Applied to Stochastic Flow in Porous Media   |
| <b>G. C. Wake, T. K. Soboleva<br/>and A. B. Pleasants</b> | 1461 | The Evolution of a Truncated Gaussian Probability Density through Time—Modelling Animal Liveweights after Selection |
